

Swayam Barik

AI Forward Deployed Engineer @ IBM

San Francisco, CA | swayambarik@gmail.com | github.com/sbrick26 | linkedin.com/in/swayam-barik

SUMMARY

AI Forward Deployed Engineer at IBM owning enterprise agent deployments end to end across 116 accounts: security-hardened MCP servers and agentic mainframe-modernization frameworks running live in production, turning evaluations into purchases and trials. Exceeded first-year quota by 125%.

EXPERIENCE

AI Forward Deployed Engineer

Jan 2026 - Present

IBM, Client Engineering

Cut order-management incident resolution from hours to minutes via an MCP platform over a live Sterling OMS, exposing 1,060 APIs through 20 Python tools with full audit trails.

Win a platform bake-off vs Copilot Studio with a watsonx Orchestrate agent triaging 2,000-3,000 daily EDI alerts by severity for a national beverage manufacturer.

Modernize legacy RPG end to end with an AI agent on a live IBM i - 10,000+ line rule extraction, fixed-to-free conversion, on-box compile - drawing purchase interest from a state pension fund.

Ship a 3-agent HR pilot on live Workday and ServiceNow tenants, fixing ~8,000-line context-overflow timeouts with a list-then-detail tool, moving a sports entertainment account to pricing.

Create Bobathon, a full-day enterprise hackathon series run 10+ times, converting 2 trucking clients into product purchases and a financial-services client into a premium IBM Z trial.

Mentor intern hackathon teams to a 1st-place finish out of 25 and an MCP pilot-reuse tool adopted by client engineers across a US go-to-market segment.

AI Solutions Engineer

Mar 2025 - Jan 2026

IBM

Exceeded first-year quota by 125% across 20+ enterprise accounts, owning technical evaluations end to end and differentiating watsonx from Azure OpenAI, Bedrock, and Vertex AI.

Generated 314 pipeline opportunities with a live watsonx demonstration at AWS re:Invent that drew ~400 attendees to the IBM booth session.

Software Engineer

Feb 2022 - Apr 2025

Qureez

Engineered a real-time ERCOT grid-dispatch integration reaching 80% dispatch success during grid overload events and shipped an RBAC system to AWS Marketplace serving hundreds of accounts.

Launched AI Bench Studio, an infrastructure benchmarking platform (YCSB/TSBS + Grafana) on AWS Marketplace, and drove a PWA migration raising mobile app usage ~50%.

Led a 5-person offshore team delivering full-stack web, mobile, and IoT energy platforms in TypeScript, React, Next.js, and Node.js for commercial and industrial buildings.

Software Engineer, iOS Profile Team

Jun 2022 - Jan 2024

LinkedIn

Shipped user-facing Swift/Objective-C features across the core profile; Top Skills engaged 600K+ members with a ~10% weekly-active-user lift in LIX A/B tests.

Lifted profile updates ~14% and career-break additions ~11% by designing Next Best Action prompts and the Career Break feature under the Skills First initiative.

Engineered 2 reusable API-driven iOS components, a stateful Connect/Follow action button and a re-orderable skills module, adopted across multiple profile sections.

Software Developer

Aug 2021 - Dec 2021

ALNA Properties

Automated manual MLS listing review with a Python + Firebase BI tool scoring thousands of listings daily via image-processing AI, cutting outsourcing costs 80%.

SKILLS

languages + core: Python, SQL / Db2, TypeScript / JS, Swift / Obj-C

ai / agents: watsonx Orchestrate, Agent SDK, MCP servers, Agent guardrails / governance, Mainframe modernization (Z / i), LLM APIs + prompts, Evals, IBM Bob

cloud + data: AWS, OAuth 2.0 / OpenAPI, MS Graph / Workday / ServiceNow, Docker

customer-facing: POC design + deployment ownership, Technical scoping + discovery, Stakeholder management, Competitive displacement + ROI, Tech lead / intern leadership

EDUCATION

Software Engineering Bootcamp

2020

Dominican University of California
