## AI Forward Deployed Engineer @ IBM

San Francisco, CA | swayambarik@gmail.com | github.com/sbrick26 | linkedin.com/in/swayam-barik

---

### SUMMARY

AI Forward Deployed Engineer at IBM owning enterprise agent deployments end to end across 116 accounts: MCP servers, multi-agent orchestration, and agent-driven mainframe modernization on live production systems, turning evaluations into 3 enterprise purchases. Exceeded first-year quota by 125%.

### EXPERIENCE

#### AI Forward Deployed Engineer

Jan 2026 - Present

*IBM, Client Engineering*

Cut order-management incident resolution from hours to minutes with an MCP platform wiring an agent into a live Sterling OMS across 1,060 exposed APIs.

Win a platform bake-off vs Copilot Studio with a watsonx Orchestrate agent triaging 2,000-3,000 daily EDI alert emails by severity for a beverage manufacturer.

Modernize legacy RPG on a live IBM i with an agent that extracts rules from a 10,000+ line file and compiles on the box, drawing purchase interest from a state pension fund.

Scale an enterprise HR agent system to 6 orchestrated agents on live Workday and ServiceNow tenants, fixing 8,000-line context overflows and moving a sports entertainment client to pricing.

Convert a self-designed full-day hackathon series, run 10+ times, into 3 product purchases at national freight carriers plus a premium mainframe trial at a financial-services client.

Mentor intern hackathon teams to a 1st-place finish out of 25 and an MCP pilot-reuse server now official IBM tooling slated for hundreds of engineers.

#### AI Solutions Engineer

Mar 2025 - Jan 2026

*IBM*

Exceeded first-year quota by 125% across 20+ enterprise accounts, owning technical evaluations end to end and differentiating watsonx from Azure OpenAI, Bedrock, and Vertex AI.

Generated 314 pipeline opportunities from a live watsonx demonstration at AWS re:Invent that drew ~400 attendees to the IBM booth session.

#### Software Engineer

Feb 2022 - Apr 2025

*Qureez*

Engineered a real-time ERCOT grid-dispatch integration reaching 80% dispatch success during grid overload events and shipped an RBAC system to AWS Marketplace serving hundreds of accounts.

Launched AI Bench Studio, an infrastructure benchmarking platform (YCSB/TSBS + Grafana) on AWS Marketplace, and drove a PWA migration raising mobile app usage ~50%.

Led a 5-person offshore team delivering full-stack web, mobile, and IoT energy platforms in TypeScript, React, Next.js, and Node.js for commercial and industrial buildings.

#### Software Engineer, iOS Profile Team

Jun 2022 - 2024

*LinkedIn*

Shipped user-facing Swift and Objective-C features across the core profile; Top Skills engaged 600K+ members with a ~10% weekly-active-user lift in LIX A/B tests.

Lifted profile updates ~14% and career-break additions ~11% by designing Next Best Action prompts and Career Break Associations under the Skills First initiative.

Built 2 reusable API-driven iOS components, a stateful Connect/Follow action button and a re-orderable skills module, adopted across multiple profile sections.

#### Software Developer

Aug 2021 - Dec 2021

*ALNA Properties*

Automated manual MLS listing review with a Python and Firebase BI tool scoring thousands of listings daily via image-processing AI, cutting outsourcing costs 80%.

### SKILLS

**languages + core:** Python, SQL / Db2, TypeScript / JS, Swift / Obj-C

**ai / agents:** watsonx Orchestrate, Agent SDK, MCP servers, Agent guardrails / governance, Mainframe modernization (Z / i), LLM APIs + prompts, Evals, IBM Bob

**cloud + data:** AWS, OAuth 2.0 / OpenAPI, MS Graph / Workday / ServiceNow, Docker

**customer-facing:** POC design + deployment ownership, Technical scoping + discovery, Stakeholder management, Competitive displacement + ROI, Tech lead / intern leadership

### EDUCATION

#### Software Engineering Bootcamp

2020

*Dominican University of California*
